CARRIER OBJECTIVE

Junior Front End Developer with a Full Stack Web Developer certification from Code Institute and 2 years of coding experience. Combining my technical engineering background and experience teaching computer science, I aim to leverage my diverse skill set and passion for coding to contribute to the development of immersive and user-friendly web applications. I create scalable web applications and work across full-stack development, with a passion for front end and UX design. My key languages are HTML, CSS, JavaScript, React, Python and Django. I'm continuously expanding my knowledge base and currently honing my skills in PHP.
